

What is claimed is:

1. A rubber composition containing a mixed filler of carbon black and silica, characterized in that a resin is compounded in an amount of not less than 4 parts by weight based on 100 parts by weight of a rubber component containing not less than 40% by weight of butadiene rubber and styrene-butadiene copolymer rubber.
2. A rubber composition according to claim 1, wherein an amount of the butadiene rubber in the rubber component is not more than 60% by weight.
3. A rubber composition according to claim 1, wherein the styrene-butadiene copolymer rubber has a bound styrene content of not more than 40% by weight.
4. A rubber composition according to claim 1, wherein an amount of the styrene-butadiene copolymer rubber in the rubber component is 40 to 60% by weight.
5. A rubber composition according to claim 1, wherein an amount of the resin is not more than 10 parts by weight based on 100 parts by weight of the rubber component.
6. A rubber composition according to claim 1, wherein a compounding ratio of carbon black to silica in the mixed filler is 45/20 to 30/35.
7. A rubber composition according to claim 1, wherein a thiuram based vulcanization accelerator is further compounded in an amount of not less than 0.5 part by weight based on 100 parts by weight of the rubber component.
8. A rubber composition according to claim 7, wherein the amount of the thiuram based vulcanization accelerator compounded is not more than 3.0 parts by weight of the rubber component.
9. A pneumatic tire comprising a tread portion made from a rubber composition as claimed in any one of claims 1 to 8.
